

Target Market Determination

HLB Wealth Management Tailored Portfolio Service

Effective: 31 October 2025

Introduction

This Target Market Determination (**TMD**) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). This TMD describes the class of consumers that comprises the target market for the financial product and matters relevant to the product's distribution and review (specifically, distribution conditions, review triggers and periods, and reporting requirements). Distributors must take reasonable steps that will, or are reasonably likely to, result in distribution of the product being consistent with the most recent TMD (unless the distribution is excluded conduct).

This document is **not** a product disclosure statement (**PDS**) and is **not** a complete summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the MDA Contract or other offer document for Implemented Portfolios Pty Limited's MDA Service before making a decision whether to invest through this product.

Important terms used in this TMD are defined in the TMD Definitions which supplement this document. Capitalised terms have the meaning given to them in the product's MDA Contract and Investment Program Booklet, unless otherwise defined. The MDA Contract and Investment Program Booklet can be obtained by contacting Implemented Portfolios Pty Limited.

Description of Target Market

TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

Green - In target market	Amber - Potentially in target market	Red - Not in target market
--------------------------	--------------------------------------	----------------------------

Instructions

In the Consumer Attributes table below, Column 1 indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

Appropriateness

In the Target Market Summaries the Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market, as the features of this product in Column 3 of the table below are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product or managed account as part of a diversified portfolio (typically with an intended product use of satellite/small allocation or core component). In such circumstances, the product or managed account should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product or managed account with a High or Very High risk/return profile is consistent with the consumer's objectives for that allocation notwithstanding that the risk/return profile of the consumer as a whole is Low or Medium. In making this assessment, distributors should consider all features of a product (including its key attributes).

The FSC has provided more detailed guidance on how to take this portfolio view for diversification which is available on the FSC website.

Target Market Summaries – Investment Categories

The table below provides a summary of the target market determination that applies for each investment category available within the MDA Service. You should refer to the relevant Investment Programs Booklet for further information on the Investment Programs available and your selected program.

Investment Category	Investment Programs Available	Target Market Summary
Multi-Sector 40% - 60% Growth	50/50 Tailored Portfolio – Direct 50/50 Tailored Portfolio – Compact	The programs within this investment category are likely to be appropriate for a consumer who desires a modest level of capital stability. They are also willing to accept moderate investment value volatility in return for commensurate potential investment performance. The models are diversified and designed for consumers with a medium investment timeframe and a medium to high risk/return profile
Multi-Sector 60% - 80% Growth	60/40 Tailored Portfolio – Direct 60/40 Tailored Portfolio – Compact 70/30 Tailored Portfolio – Direct 70/30 Tailored Portfolio – Compact 80/20 Tailored Portfolio – Direct 80/20 Tailored Portfolio – Compact	The programs within this investment category are likely to be willing to accept higher levels of investment value volatility compared to more defensive options in return for higher potential investment performance. Some exposure to interest bearing assets is still desired, but the primary concern is a higher return. The models are diversified and designed for consumers with a medium to long term investment timeframe and a high risk/return profile.
Multi-Sector >80% Growth	90/10 Tailored Portfolio – Direct 90/10 Tailored Portfolio – Compact	The programs within this investment category are likely to be appropriate for a consumer seeking a diversified portfolio with a strong preference for capital growth over capital stability. The models are diversified and designed for consumers with a medium to long-term investment timeframe and a very high risk/return profile.
