Market Commentary

Last updated: September 30, 2026

Global share markets delivered modest gains over the September quarter, despite an increasingly challenging backdrop as the period progressed. Resilient economic conditions and corporate earnings supported markets, but persistent inflation and renewed Middle East tensions contributed to higher oil prices and a reassessment of interest rate expectations. These pressures intensified in September, when both the US Federal Reserve and Reserve Bank of Australia raised interest rates. Government bond yields rose as investors adjusted to the prospect of rates remaining higher for longer, weighing on fixed interest and interest rate-sensitive assets towards quarter end.

Australian shares delivered modest gains, with the S&P/ASX 200 Index rising +1.3%. Healthcare led the market following improved company results, while energy benefited from sharply higher oil prices. Materials also advanced, supported by higher copper and gold prices despite weakness in iron ore. In contrast, higher bond yields weighed on technology and real estate, while consumer discretionary also declined. Smaller companies underperformed, with the S&P/ASX Small Ordinaries Index declining -0.5%.

International shares delivered modest gains, with the MSCI All Country World Index rising +1.4% hedged and +1.2% unhedged. US shares advanced, supported by continued strength in AI-related technology companies, while Japan also gained. Europe was slightly weaker as higher energy costs and interest rate concerns weighed on sentiment. Emerging markets declined, with the MSCI Emerging Markets Index down -0.8% unhedged, with China and Taiwan advancing but India and South Korea weakening. Global small companies also underperformed, with the MSCI World ex Australia Small Cap Index falling -4.3%, as higher interest rates and more cautious risk sentiment favoured larger companies.

Property and infrastructure declined over the quarter as rising government bond yields reduced the relative appeal of income-oriented assets. Global listed property fell, with the FTSE EPRA NAREIT Developed Index (hedged) down -6.1%, while the FTSE Global Core Infrastructure 50/50 Index (hedged) declined -6.5%.

Fixed interest markets weakened as government bond yields rose across major markets amid persistent inflation concerns and expectations that interest rates could remain higher for longer. Australian fixed interest declined, with the Bloomberg AusBond Composite 0+ Yr Index down -1.5%, while the Bloomberg Global Aggregate Bond Index (hedged) fell -2.4%. Credit markets were mixed. Australian credit remained positive, supported by relatively high short-term interest rates, while global investment-grade and high-yield credit declined.

Portfolio Commentary

Australian shares produced mixed results over the quarter. **Alphinity Australian Share (-0.3%)** was broadly flat, with weak health care and materials positioning outweighing gains in technology and industrials during a tougher August reporting season. **Macquarie True Index Australian Shares (+1.3%)** tracked the local market, which delivered modest gains. **Evidentia Quality Core Portfolio (+0.3%)** was marginally positive but lagged the local market, as health care and materials strength was offset by weakness in financials, listed property and consumer discretionary holdings.

International shares produced positive returns over the quarter. **GQG Partners Global Equity (+1.9%)** delivered solid gains supported by overweights to technology and energy, with favourable stock selection within technology a key contributor. **Talaria Global Equity (+3.5%)** had a strong quarter led by technology hardware, pharmaceutical and gold mining holdings, notably achieved despite carrying reduced overall market exposure. **Aoris International (+3.6%)** outperformed, driven by enterprise software holdings benefiting from cloud growth and AI adoption alongside strength in industrial services positions. **Vinva Global Alpha Extension (+2.5%)** rose, supported by quality, short-term and valuation signals alongside overweights to software and data storage. **Acadian Enhanced Emerging Markets Equity (+0.6%)** rose slightly and outperformed the broader emerging markets index, with an overweight to South Korea and positive Chinese stock selection outweighing headwinds from South African positioning. **Yarra Global Small Companies (-2.4%)** declined in a challenging environment for small caps, though outperformed the falling benchmark, supported by technology hardware and US holdings, partially offset by weakness in electrical equipment.

Infrastructure and property faced headwinds as bond yields rose. **ClearBridge Global Infrastructure Income (-7.0%)** fell sharply as rising bond yields pressured renewables and utilities holdings, with only partial offset from strength in Asia Pacific gas infrastructure. **Ironbark DWS Global Property Securities (-6.8%)** fell sharply, as data centre holdings weighed on returns, partly offset by favourable positioning in US senior housing property.

Fixed interest markets faced headwinds as yields rose. **iShares Government Inflation ETF (-1.4%)** fell as rising real bond yields weighed on prices, with inflation-linked income providing only partial cushion. **Macquarie True Index Australian Fixed Interest (-1.5%)** tracked local bonds lower as local government bond yields rose. **iShares Global Bond Index (-2.5%)** fell as government yields spiked on higher-for-longer rate expectations. **PIMCO Global Bond (-3.3%)** declined as global yields rose, with UK and US duration and agency mortgage exposures detracting, partially offset by underweights to Japanese and Singaporean duration. **Realm Short Term Income (+1.3%)** delivered solid income returns led by structured credit and subordinated debt, with very low duration limiting yield-driven headwinds. **Yarra Enhanced Income (+0.3%)** posted a modest gain as carry income was largely offset by duration drag.

Portfolio Changes Commentary

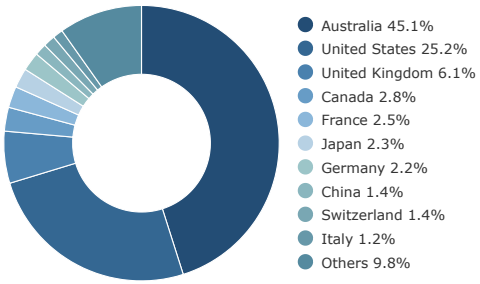

A review of global shares identified an opportunity to reduce reliance on a single high-conviction manager and improve the consistency of returns. Vinva's quantitative long/short approach offers more consistent excess returns with lower dependence on market direction. **GQG Partners Global Equity** was therefore trimmed slightly, with the proceeds redirected to **Vinva Global Alpha Extension**.

To build resilience against weaker growth, exposure to Australian duration was increased while credit was trimmed. Hedged global fixed interest now offers an attractive yield of more than 5% per annum, while tight credit spreads offer comparatively modest compensation for credit risk. **Realm Short Term Income** and **Yarra Enhanced Income** were therefore trimmed, with the proceeds used to increase **Macquarie True Index Australian Fixed Interest** and **PIMCO Global Bond**.

Composition Methodology (where shown): Country exposure weights are proportionally adjusted across the total portfolio using available data. Credit quality weights apply only to ratings within the fixed interest sleeve. Sector and market capitalisation exposure weights are based on proportionally adjusted estimates derived from available data across the combined Australian and international shares, property, and infrastructure sleeves. Aggregated Top 10 Holdings (Australian & International Shares) tables show the largest positions by portfolio weight, derived from proportionally adjusted estimates based on available data across the combined Australian and international shares sleeves — incorporating the top 10 holdings from active funds (where available), all holdings within ETFs, and any direct equity sleeves.

Performance Disclaimer: Performance numbers are provided by BT where available. Where this data is not available (usually between when the portfolio is first established and when the first investment occurs), Morningstar is used to generate performance numbers. We do not warrant the accuracy of this data. The performance numbers represent estimates for Model Portfolio performance. The Model Portfolio is a notional portfolio, and these returns will differ from the returns experienced by individual clients. Performance numbers are net of fees and rebates and are before tax (where Morningstar data is used, these numbers do not include transaction costs). Please refer to the PDS for the indices that comprise the Model Portfolio's benchmark. Morningstar Peer Group information is a simple average of all the funds within a particular Morningstar Category. As the percentage numbers in this document are rounded to the nearest 0.1%, the sum of individual numbers may not always add up to 100%.

Composite Disclaimer: The performance numbers outlined in the Evidentia Composite Performance section are for the Evidentia Composite Portfolios. Composite portfolio performance does not represent actual portfolio performance, but instead represents the equally weighted average performance of a group of actual portfolios managed by Evidentia Group on behalf of its clients, according to similar investment objectives or risk profiles. Composite portfolio performance provides an effective method for measuring a portfolio manager's past performance when the actual performance history for a new portfolio, managed by the same portfolio manager with a similar investment objective or risk profile, is limited or unavailable. Although the Evidentia Composite Portfolios provide a useful tool for presenting past performance in a fair and accurate manner, it is important to understand past performance does not guarantee future performance or protect against investment risks. Investors should carefully review past performance information and other relevant information before making investment decisions.
